HEADQUARTERS

New Refinery & Office
Kuala Lumpur, MY

A new standard in Malaysian gold.

Established in 2024. From trading floor to integrated refinery in under a year.

Founded 2024. Now operating **our own refinery** from a larger office and production facility.

Refined to the **LBMA standard**. Every bar fire-assayed, XRF-verified, hallmarked, serial-logged.

Director **Issaq Qaleesh** leads a team of 15 full-time and 43 part-time. Serving banks, koperasi, jewellers and family offices.

What sets us apart

- i.* **LBMA-grade refining**
Dual-verified by fire assay and XRF.
- ii.* **Institutional partner**
Bulk pricing, full documentation.
- iii.* **Twelve services, one floor**
Brokerage, custody, certificates, financing.
- iv.* **Director-led trust**
Direct access to leadership for institutional clients.

INDUSTRY FIRST

One of the only XRF-verified refiners in MY

59

TEAM

15 full-time · 43 part-time

ii. SECTION TWO · DIRECTION

Where we are *headed*, and how we get there.

i. OUR VISION

To redefine the future of *gold*.

To set new standards in **excellence, transparency, and sustainability**. To create lasting value for generations.

Gold as more than wealth. As a foundation for security and shared prosperity.

ii. OUR MISSION

Four *commitments* that guide every gram.

Premium quality

Deliver gold products and services that meet the highest international benchmarks.

Trust-based partnerships

Build enduring relationships with clients and partners worldwide.

Innovation & efficiency

Drive forward the practice of gold trading, refining, and investment.

Responsible sustainability

Contribute positively to the communities and environments we touch.

iii. SECTION THREE · PEOPLE

Director-led. Operator-strong.

FOUNDER · DIRECTOR

Issaq Qaleesh

Issaq holds a Bachelor of Laws (LLB) from **Queen's University Belfast**, a foundation that shapes his approach to governance, compliance and cross-border commerce.

In 2024 he moved straight from studies into entrepreneurship. Souk Gold Bullion serves individual investors, institutional clients and koperasi across local and international markets, providing strategic access to bullion trading and precious-metals investment, built on trust, long-term value and cross-border commercial relationships.

Issaq Qaleesh

A team built for *scale*.

Headcount has scaled with the refinery. Every bar handled by trained operators under defined process control.

15

FULL-TIME STAFF

Refining, assay, trade desk, custody & client services.

43

PART-TIME OPERATORS

Production, logistics, vault & weekend trading support.

OPERATIONS SPAN

- Refinery & finishing
- Fire assay laboratory
- Trade desk & brokerage
- Vault & custody
- Logistics & transit
- Client services
- Compliance & KYC
- Certificate issuance

iv. SECTION FOUR · FACILITY

A larger floor for a *refining* standard.

A larger office and production facility, purpose-fitted for refining, assay, custody and trade.

Refining, lab, vault and trade desk under one operationally-controlled floor. Built for institutional demand.

i. **In-house refinery**

Casting, cupelling, finishing.
Fully integrated.

ii. **Fire assay + XRF lab**

Malaysia's one and only XRF-equipped bullion refiner.

iii. **High-security vault**

Custody for institutional, koperasi & private clients.

iv. **Trade desk & client suite**

Walk-in retail, institutional brokerage & private viewing rooms.

V. SECTION FIVE · ASSURANCE

One of the only XRF-verified refineries in Malaysia.

INDUSTRY FIRST · MALAYSIA

Souk is one of the *only* gold companies in Malaysia with an in-house *X-Ray Fluorescence* machine. Non-destructive, real-time purity verification on every bar.

Every bar passes **two-stage verification** : laboratory fire assay plus on-floor **XRF spectroscopy** . The same instrumentation used by the world's leading bullion houses. XRF reads elemental composition in seconds. Non-destructive. **Cross-checked against fire assay** and logged to the bar's serial. Every stage logged, signed-off, traceable. **Independently verified** from source to vault.

VERIFIED STANDARD

Assayed to 999.9 / 24K

Dual verification: laboratory fire assay and on-floor XRF spectroscopy. LBMA-aligned process control.
